CARGO 140

ATP

Isothermal container with front opening for the transport of chilled and frozen products at controlled temperature

- Excellent load capacity, indicated for transporting **large quantities**.
- Capacity: 140 litres.
- The insulation provided by the walls of the container (especially thick in this model) ensures proper temperature retention, limiting the risk of bacterial proliferation whilst preserving food quality and organoleptic characteristics.
- **Stackable** and easily movable thanks to the transport trolley in galvanised steel
- It assures proper temperature retention, limiting the risk of bacterial proliferation whilst preserving food quality and organoleptic characteristics.
- The isothermal characteristics comply with current regulations (ATP, EC Reg. 852/2004 –HACCP-) and with applicable technical standards (Accord AFNOR AC D40-007).
- Produced with rotational moulding technology: the container and the door have a monolithic structure (no sharp corners, junctions and welds).
- Designed to be long lasting: performance remains basically unaltered when reused.
- **Fully recyclable** at the end of the operating life.
